

Thank you for Registering for *Gaming* in Project Management Curricula

At the University of Scranton

Saturday, April 21, 2018 9:00 am to 4:00 pm

Featuring SimulTrain® for Faculty & Students

The SimulTrain® Project Management game prepares students for the challenges of project management in a controlled, engaging - and realistically stressful - environment. In this workshop you will learn the value of a project management education for your students and your school's program. You'll play the SimulTrain® game, gain hands-on experience, explore where it might fit into an existing, or planned, curriculum, and *have fun* competing with students and faculty from other schools!

To enrich your workshop experience, follow these links:
